Absorbent pad

US5718699A - Johnson & Johnson

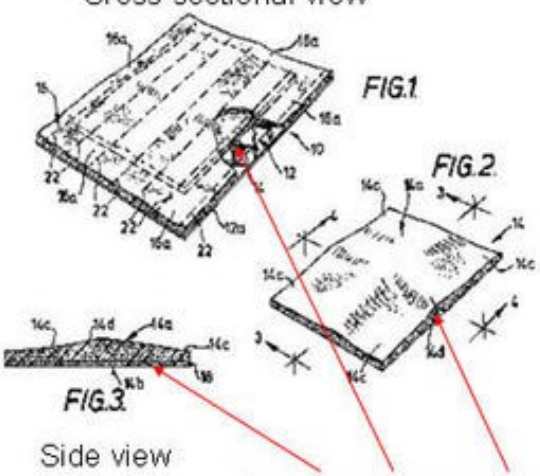

Side edges of absorbent material

Structure having longitudinally extending side edges and transversely extending end portions (of absorbent material)
- Enhances protection against leakage at the side edges

GB1438412A - Johnson & Johnson

Cross sectional view

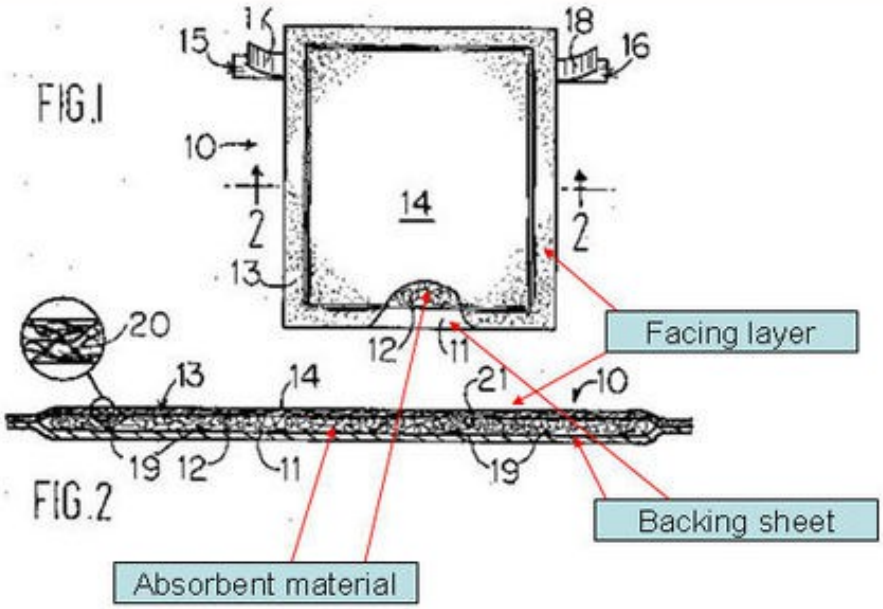

Side view

Double contoured batt layer

Double contoured batt layer of highly porous sandwiched between a porous facing layer and a water-impervious sheet. - High wettability and high fluid retentively

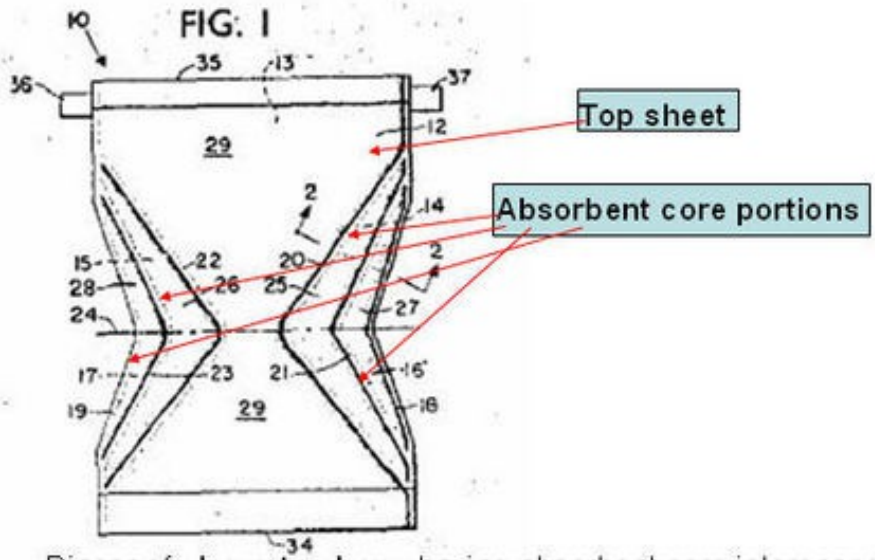

Dolcera

US4077410A - Johnson & Johnson

Fluid-impermeable backing sheet on which a layer of absorbent material is placed and a soft, body fluid-permeable facing sheet overlying said absorbent material - Soft feel, High absorption

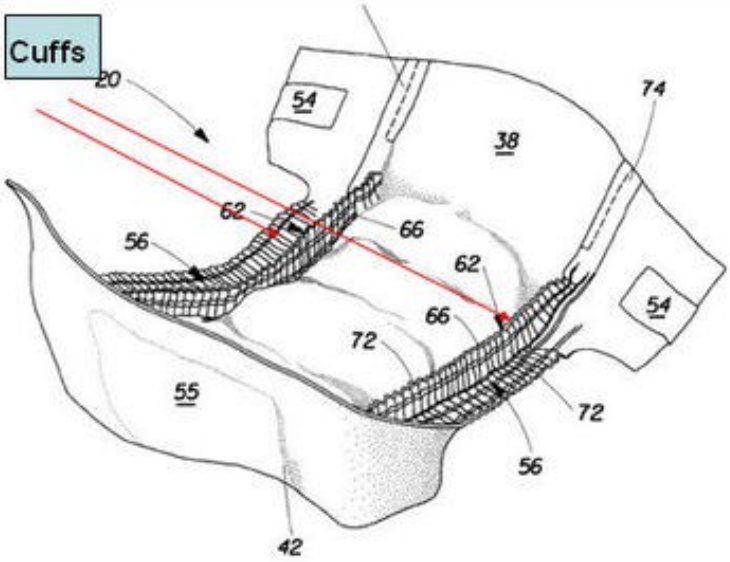

Dolcera GB1343708A -Procter & Gamble

Diaper of **elongate shape** having absorbent core interposed between a moisture-permeable top sheet and a water impervious backing sheet.

Improves the ability of the diaper to contain fluids and easily applied.

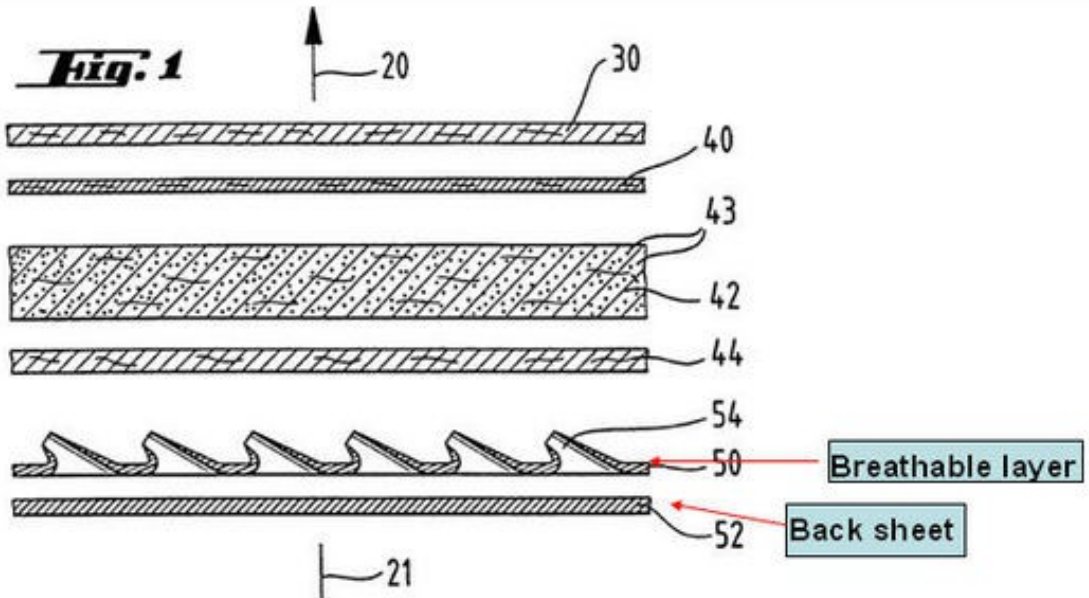

Dolcera WO1999056796A1 - Procter & Gamble

The skin care composition disposed on the cuffs is transferable to the wearer's skin by normal contact to body. It prevents rash, erythema, heat rash, abrasion, pressure marks, and skin barrier loss.

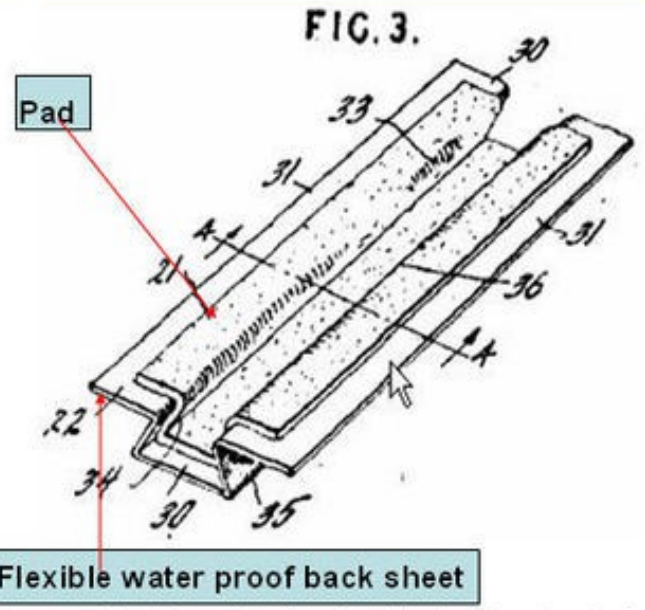

Dolcera

WO19990396672A1 - Procter & Gamble

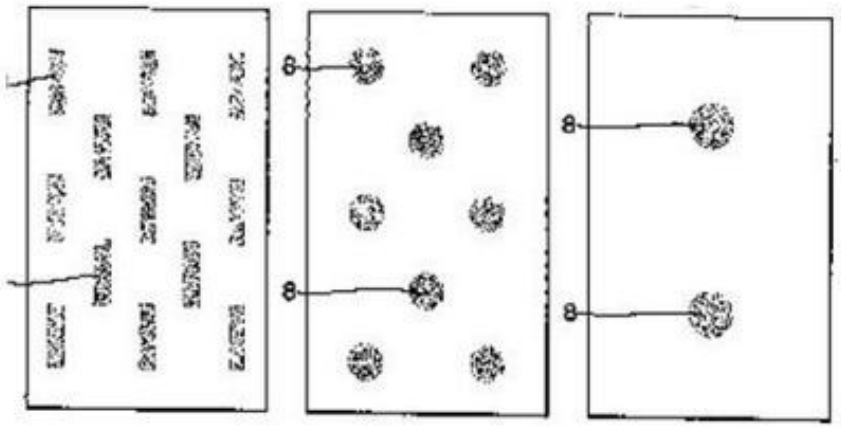

Aperture back sheet having breathable layer of a resilient for breathability (leakage safe vapor permeable allowing gaseous exchange with the environment - reduces the sticky feeling)

GB1011888A - Procter & Gamble

Diaper of **rectangular form** having flexible back sheet of waterproof material and a pad of absorbent material.
Rectangular diaper having more absorptive area.

GB1340138A - Procter & Gamble

Alternative patterns for indicating agent (blue phthalocyanine dye and talcum powder) on absorbent pad - Indicates when to dispose diaper.
