## Drug name

Amino Mass

## Drug Uses

Amino Mass provides the amino acid combination used in a landmark study to promote the release of human growth hormone (HGH). HGH stimulates the production of protein in muscle cells and the breakdown of fats. This product maximizes the benefits from your workouts.

## How Taken

As a dietary supplement, take 4 capsules daily preferably between meals.

## Drug Class and Mechanism

The body uses amino acids to construct proteins for building muscle and other needs. If the body does not have essential amino acids available from the diet when needed, it will break down its own muscle tissue. Branched-chain amino acids are popular with bodybuilding athletes and strength trainers for their anti-catabolic properties, and possible glycogen sparing activity. Amino acids are the *building-blocks* of proteins. Proteins, from the Greek word meaning *of prime importance*, constitute an array of structures. Examples of these structures include hormones, enzymes, and muscle tissue. The primary function of protein is growth and repair of body tissue (anabolism). Proteins can also be used as energy through catabolic (breakdown of tissues) reactions, such as gluconeogenesis-the process of making glucose from amino acids, lactate, glycerol, or pyruvate in the liver or kidneys. Essential amino acids (EAA):

- The essential amino acids are isoleucine, leucine, lysine, methionine, phenylalanine, threonine, tryptophan, and valine.

Nonessential amino acids (NEAA):

- The nonessential amino acids are arginine, alanine, asparagine, aspartic acid, cysteine, glutamine, glutamic acid, glycine, proline, serine, and tyrosine.

## Missed Dose

If you miss a dose of Amino Mass, take it as soon as possible. If it is almost time to take the next dose, skip the dose and go back to the regular dosing schedule. Do not double the dose to catch up.

## Storage

Store Amino Mass at 77 degrees F (25 degrees C). Brief storage between 59 and 86 degrees F (15 and 30 degrees C) is permitted. Store away from heat, moisture, and light. Do not store in the bathroom. Keep Amino Mass out of the reach of children and away from pets.

## Warnings Precautions

This product is only intended to be consumed by healthy, male adults, 21 years of age, or older. Women should not use this product. Before using product, seek advice from a physician if you are taking any prescription, over the counter drugs, or other supplements, or have any pre-existing medical condition.

## Possible Side Effects

Amino Mass is not known to have any side effects if taken as per the prescribed dosage.

## More Information

This product contains only 100% pure pharmaceutical and medical grade ingredients and is regularly tested to ensure the safety and quality. Each ingredient has been approved as safe by the FDA and all appear on the FDA's GRAS (Generally Recognized As Safe) list. This product is manufactured under stringent GMP guidelines that have been set by the FDA. Each bottle comes with a 2 year expiration date and is double sealed to ensure freshness and potency.
