Drug name

Celadrin

Drug Uses

Celadrin is a cellular lubricant, brand new joint health breakthrough that uniquely provides fast, long lasting joint comfort.

How Taken

As a dietary supplement, take one tablet three times daily. Take without food.

Drug Class and Mechanism

Celadrin systematically enhances and lubricates cell membranes throughout the body providing youthful cell fluidity and elasticity. This includes the enhancement of fluids that cushions your bones and joints to maintain flexibility and mobility so that you can move with ease and pain free. Celadrin has been proven to provide cumulative (continuous and restorative) benefit. In a double blind clinical trial, oral Celadrin showed significant benefit beyond the arthritic medication the subjects had been taking - with cumulative improvement shown throughout the study.

Missed Dose

If you miss a dose of Celadrin, take it as soon as possible. If it is almost time for your next dose, skip the missed dose and go back to your regular dosing schedule. Do not take 2 doses at once.

Storage

Store Celadrin at room temperature, between 68 and 77 degrees F (20 and 25 degrees C). Store away from heat, moisture, and light. Keep Celadrin out of the reach of children and away from pets.

Warnings Precautions

You should not use this medication if you are allergic to Saw Palmetto, or have certain conditions. Be sure your doctor knows if you have:

- a bleeding or blood clotting disorder (such as hemophilia);
- stomach ulcer with active bleeding; or
- ulcerative colitis or Crohn's disease.

Before taking saw palmetto, talk to your doctor, pharmacist, herbalist, or other healthcare provider. You may not be able to use this product if you have:

- liver disease;
- heart disease;
- a heart rhythm disorder;
- a history of stomach ulcer; or
- asthma or other breathing disorder.

Do not take saw palmetto without telling your doctor if you are pregnant or plan to become pregnant during treatment. Saw palmetto may be harmful to an unborn baby. It is not known whether saw palmetto passes into breast milk or if it could harm a nursing baby. Do not use this product without telling your doctor if you are breast-feeding a baby. Do not give any herbal/health supplement to a child without the advice of a doctor.

Possible Side Effects

No side effects attributable to Celadrin were observed.

More Information

The anti-inflammatory actions of Celadrin have been demonstrated by one double-blind, placebo controlled trial that showed Celadrin, when taken orally at recommended intake levels, decreased pain scores and increased walking distance compared to the group receiving placebo. The authors theorize that Celadrin may work by down-regulating the effect of certain precursors of the body's inflammatory response.
