Drug name

Breast Enlargement Patch

Drug Uses

Breast Enlargement Patch is a revolutionary blend of organically grown herbs, that balances female hormones and increase breast size.

How Taken

Simply place one patch on a different location on the skin every three days. We suggest that the patch be placed on a hair-free area, if possible to avoid irritation when removing the patch. Do not place the patch on the face or genitals or immediately above the heart.

Drug Class and Mechanism

Breast Enlargement Patch helps enhance women's breast size by increasing the amount of cells in the mammary glands. Most women report breast size increases of 1 to 3 cup sizes in just 3 to 4 months. Scientific research of Breast Enlargement Patch has concluded that foundation breast tissue growth occurs most efficiently with the balanced presence of estrogen, progesterone, prolactin, prostaglandins, and GF compounds (human growth factor hormones).

Missed Dose

If you miss to place Breast Enlargement Patch, use it as soon as you remember.

Storage

Store Breast Enlargement Patch at 77 degrees F (25 degrees C). Brief storage between 59 and 86 degrees F (15 and 30 degrees C) is permitted. Store away from heat, moisture, and light. Do not store in the bathroom. Keep Breast Enlargement Patch out of the reach of children and away from pets.

Warnings Precautions

Himlasia should be used with caution in patients with hypertension.

Possible Side Effects

Breast Enlargement Patch is not known to have any side effects if taken as per the prescribed dosage.

More Information

Transdermal delivery is absorption through the skin. Doctors call transdermal delivery the delivery system of the future. Products absorbed this way go directly into the bloodstream instead of being filtered through the liver right away. This means that up to 95% of the product can go to work where they are needed instead of being filtered out of your bloodstream as they can be when taking pills. This also keeps the product out of the harsh environment of the stomach which can destroy up to 90% of some substances.
