

# Kind persssss

Copyrighted. Replicated with the kind permission of Peter Hammill (<http://www.sofasound.com>.)

Time has come between us:???? in the passing months I've felt you slip away as your words and mine came like nursery rhymes till there was nothing left to say. ???? Distance came between us long ago, as our memories faded away... over the miles I ceased to smile because nothing???? felt the same.

That's how???? it seemed a week ago, far off in time and space.

Time and distance are between us now, they form a bond to make things sure. Nothing ever shatters, you know what happens: time and distance make a love secure.

[edit]Facts This ???? song first appeared on (some copies of) the Van der Graaf Generator album The Aerosol Grey Machine and was later reworked into the version that appeared on the Peter Hammill album In Camera.
